DETAILED ACTION

Election/Restrictions

1. The restriction requirement made in the Office action mailed on 30 April 2004 is hereby withdrawn since claims 1-5 werecanceled in the preliminary amendment.

Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims 6-7 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Belmore et al (US 6,294,908) in view of Matsui et al (US 5,743,009).

Belmore discloses 604 and 606 lift and lower 302, 202 is a base steel plate, 402 is a plyup plate, 574 are fixing blocks, 190 are pins, and 402 shown in Fig. 5 has a plurality of periphery openings.

Belmore fails to disclose that the base plate is made of steel.

Matsui discloses a base steel plate 210.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Belmore by providing a base steel plate, as taught by Matsui, for the purpose of providing structural stability and reusability.

4. Claims 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Belmore et al (US 6,294,908)/Matsui et al (US 5,743,009) as applied to claims 6-7 above, and further in view of Zeiner (US 5,437,236).

Belmore/Matsui fail to disclose that the ply-up plate includes multiple pads secured on the fixing blocks, and is provided with multiple pin holes for insertion on the multiple pins.

Zeiner discloses a table top 18 with a plurality of holes and the top includes multiple pads secured on the fixing blocks (Fig. 6).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Belmore/Matsui by providing the ply-up plate includes multiple pads secured on the fixing blocks, and is provided with multiple pin holes for insertion on the multiple pins, as taught by Zeiner, for the purpose of easily attaching and detaching workpiece with different shape and size.

Conclusion

- 5. Please provide reference numerals (either in parentheses next to the claimed limitation or in a table format with one column listing the claimed limitation and another column listing corresponding reference numerals in the remark section of the response to the Office Action) to all the claimed limitations as well as support in the disclosure for better clarity (optional). Applicants are duly reminded that a full and proper response to this Office Action that includes any amendment to the claims and specification of the application as originally filed requires that the applicant point out the support for any amendment made to the disclosure, including the claims. See 37 CFR 1.111 and MPEP 2163.06.
- 6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rick K. Chang whose telephone number is (703) 308-4784. The examiner can normally be reached on 5:30 AM to 1:30 PM, Monday through Thursday.
